**FAILURE TO COMPLY WITH THE ABOVE MENTIONED PRE-QUALIFICATION INSTRUCTIONS WILL LEAD TO DISQUALIFICATION**
TERMS OF REFERENCE

(PROJECT DURATION 12 MONTHS)

1. BACKGROUND

The National Development Plan (NDP) has observed that:

‘South Africa has struggled to achieve constructive relations between the three spheres of government. A lack of clarity about the division and coordination of powers and responsibilities together with the lack of coherent and predictable mechanisms for delegating and assigning functions has created tensions and instability across the three spheres.” (p.377)

The issue of how powers and functions are governed and managed within the framework for cooperative governance, has become particularly prominent as part of the required strengthening, and or reforms, to the two-tier local government system (LG). This approach aligns to the recommendations of the National Development Plan (NDP) and the current requirements of the Medium Term Strategic Framework to strengthen cooperative governance.

Firstly, research and field studies by Department of Cooperative Governance (DCoG) and other entities and institutions have consistently demonstrated that providing clarity on how powers and functions are managed, divided and governed across the two-tier LG system, is imperative to improve governance and service delivery constraints. Evidence
demonstrates that certain legislative provisions have led to uncertainty, duplication, intergovernmental contestations and the fragmentation of LG functions. There is thus, broad consensus that functional and institutional reforms are needed to improve and where required, strengthen the current intergovernmental functional landscape, in particular within the two-tier LG system.

Secondly, government has not yet issued Regulations and proper Notices on how functions are assigned, re-assigned, authorized, adjusted and revoked between district and local municipalities, as required by the various pieces of Local Government legislation.

In 2015, DCoG introduced the Reconfiguration of District Government programme (RDG). Over a two-year period, this programme focused on evidence-led assessments and focus groups with national and provincial sector departments and a selected number of district and local municipalities. This set the foundation for key legislative, policy and institutional reform options and recommendations going forward.

As it is unlikely that the two-tier LG system would be structurally reformed in its entirety over the current medium term as per below reform proposals, it is still necessary for government to have a regulated process for assignment (authorization and adjustment), revocation and re-assignment of municipal Powers and functions. LG reform proposals will therefore focus on a range of proposals, namely:

a) Determining options for improving the performance of district government in respect to their existing legislated roles and the Constitution;

b) Re-positioning, or rationalizing other districts in the context of urbanization and their spatial profiles;

c) Defining the optimal roles to be performed by district or regional government, in respect to their coordination and development facilitation roles, and;

d) **Reviewing, developing and amending legislation that can constrain effective regional governance (relevant for this current assignment)**

The focus of the project outlined below is thus centered on revisiting the functional assignments and processes as described under sections 84 and 85 of the Local Government: Municipal Structures Act, 1998 (Act No 117 of 1998) (“The Structures Act”), but with a particular focus on what key amendments should be considered in relation to the processes of functional assignment (authorization and delegation), revocation, and re-
assignment by the Minister of COGTA and Member of the Executive Council (MEC). Furthermore, the project aims to also deliver on the development of specific implementation and process Regulations and Notices as it pertains to what processes are to be followed for Ministerial authorisations, revocations, and re-assignment of municipal functions. Both objectives should pay close attention to sections 9 and 10 requirements in the Local Government: Municipal Systems Act, 2000 (Act No 32 of 2000) ("The Systems Act"), for further legislative amendments and regulation formulation and adherence.

2. OVERALL OBJECTIVE

The overall objective of this legislative-based project is to:

a) Ascertain how amendments to the Structures Act could facilitate a differentiated approach to the structure and functions of two-tier local government. This is important in respect to the creation of single-tier local government in more urbanized areas, where a rationalization process could remove B1 municipalities from the ambit of a district council; and;

b) Develop implementation and process regulations to guide the authorization and revocation process between local and district municipalities as provided for in the Structures Act Section 84 (3) (a) (b) (c) (d) (e).

As noted, the Structures Act provides for these processes, but no Regulations have ever been issued to guide authorisation of any of the four functions currently ascribed to district municipalities.

3. DISCUSSION

The four functions prescribed in the Structures Act (S84) for authorization by the Minister responsible for Local Government are key for effective service delivery and end-user satisfaction from communities (potable water supply systems; bulk supply of electricity….; domestic waste water and sewage disposal systems; and municipal health systems). By assigning these priority functions to districts, the original basis for district government was overturned (redistribution, coordination, bulk purchasing, support) and entities with no previous experience in direct service delivery were placed at the forefront of such delivery.
Most authorisations for these functions were made in 2003 and little has changed since then. This, despite increasing evidence and calls for reviews of the status quo and for shifting of functions where finance, capacity and skills reside.

It is therefore a critical matter for DCOG to provide a regulatory environment to facilitate authorization and revocation where these are clearly a matter of pressing need if the service is to be well-governed and managed.

An example of a function that is surrounded by increasing urgency regarding effective location and governance of powers and functions within the two-tier system is the assignment of the Water Service Authorities in South Africa, whereby 21 district municipalities are legally authorized for this function and approximately 150 local municipalities. But research and practice has demonstrated over the years that current Water Service Authority (WSA) arrangements are largely sub-optimal for effective management and delivery of water services in municipalities. This has a highly negative impact on service delivery and undermines the effective performance of local government.

To this effect, there are an increasing amount of requests to DCOG to revoke an authorization and re-authorize another entity to perform the function. As water services tend to be managed together with waste-water and sewage responsibilities, this cluster makes up a significant proportion of priority services.

Thus within the overall framing of this project, it is important to recognize the history and purpose of the local government legislation in this regard as well as to be cognizant of the substantive technical procedures that have to be employed when a function is adjusted. These may be effected either through the MEC adjustment process, or brought into the forefront through a proposed revocation / authorization process of any of the four major services currently prescribed for districts in the Structures Act.

Furthermore, the following are other elements that the review process would need to consider:

a) Would government benefit from a more holistic authority process to govern and regulate assignment and transfer of functions between local and district municipalities?

b) Would local government benefit from a system of powers and functions that is fully administered by the Minister responsible for local government?
c) Should the Minister not have a greater say in functional adjustments instead of leaving it squarely in the hands of MECs?

d) Are the 4 functions sufficient for Ministerial Authorizations or can others like firefighting be considered?

e) Should the Municipal Demarcation Board (MDB) in relation to capacity assessments, not play a much pro-active role in Minister’s authorizations, revocations and even in adjustments over and above the MEC’s request?

f) Should more pro-active measures be introduced and enforced to ensure constant checks and balance of functional performance?

g) Are sections 9 and 10 of the Systems Act, sufficient to determine functional assignment and can it be used more prominently in Authorization and revocation Regulations?

Part 4 – Schedule G
Certificate of Independent Bid Determination

SBD 9

1. This Standard Bidding Document (SBD) must form part of all bids¹ invited.

2. Section 4 (1) (b) (iii) of the Competition Act No. 89 of 1998, as amended, prohibits an agreement between, or concerted practice by, firms, or a decision by an association of firms, if it is between parties in a horizontal relationship and if it involves collusive bidding (or bid rigging).² Collusive bidding is a *pe se* prohibition meaning that it cannot be justified under any grounds.

3. Treasury Regulation 16A9 prescribes that accounting officers and accounting authorities must take all reasonable steps to prevent abuse of the supply chain management system and authorizes accounting officers and accounting authorities to:
   a. disregard the bid of any bidder if that bidder, or any of its directors have abused the institution’s supply chain management system and or committed fraud or any other improper conduct in relation to such system.
   b. cancel a contract awarded to a supplier of goods and services if the supplier committed any corrupt or fraudulent act during the bidding process or the execution of that contract.

4. This SBD serves as a certificate of declaration that would be used by institutions to ensure that, when bids are considered, reasonable steps are taken to prevent any form of bid-rigging.

5. In order to give effect to the above, the attached Certificate of Bid Determination (SBD 9) must be completed and submitted with the bid:

¹ Includes price quotations, advertised competitive bids, limited bids and proposals.

² Bid rigging (or collusive bidding) occurs when businesses, that would otherwise be expected to compete, secretly conspire to raise prices or lower the quality of goods and / or services for purchasers who wish to acquire goods and / or services through a bidding process. Bid rigging is, therefore, an agreement between competitors not to compete.
